PROFILE

Full Stack Developer experienced in integrating LLM APIs (Google Gemini) and RAG pipelines, including embeddings, semantic search, and vector similarity, into full-stack applications using MongoDB, Express.js, React.js, and Node.js.

SKILLS

Technical: MERN Stack, RAG & Vector Embeddings, AI/LLM Integration, Next.js, TypeScript, Tailwind CSS, Framer Motion

Tools: VS Code, Git (Version Control), Chrome DevTools, Postman, Insomnia, MongoDB Atlas, Vercel

EXPERIENCE

Productify Studio

Islamabad, Pakistan

Full Stack Web Developer Intern

03/2025 – 06/2025

- Worked on the Grundwald Valuation Tool, a Next.js-based platform for company valuation and deal structuring, using React, TypeScript, Tailwind CSS, and Supabase
- Improved key user flows including onboarding, dashboard, and valuation modules for better UX.
- Integrated backend APIs for URL analysis and lead management to enhance product functionality.

Al Kasib Design

Peshawar, Pakistan

Senior Frontend Developer

07/ 2025 – Present

- Developed full-stack web applications using MongoDB, Express.js, React.js, Next.js, and Node.js.
- Built responsive & interactive user interfaces with Tailwind CSS and Framer Motion.
- Developed REST APIs and integrated frontend with backend services and MongoDB databases.

PROJECTS

Career Roadmap – AI Career Switch Planner

- Built a full-stack AI-powered career planning platform with Next.js, MongoDB, and Google Gemini API to generate personalized roadmaps.
- Designed a validation layer to sanitize AI responses before database persistence, preventing malformed data.
- Implemented JWT authentication, role-based admin access, and roadmap versioning to preserve progress history. .

AI Interview Prep Coach

- Built a full-stack RAG-based interview preparation platform that generates personalized interview questions by matching resume content against job descriptions using semantic search and vector similarity.
- Built a RAG pipeline (PDF parsing, chunking, Gemini embeddings) for AI question generation and feedback. .
- Built with Next.js, MongoDB, and Clerk authentication, featuring interview history and a responsive custom UI.

TaskFlow — Full-Stack Task Management Platform

- Built a full-stack todo app with secure authentication for creating, organizing, and managing tasks by priority and due date
- Built with Next.js (App Router), MongoDB/Mongoose, and NextAuth.js for session-based authentication.
- Delivered production-ready with protected routes, filter/sort functionality, and responsive Tailwind CSS design, deployed on Vercel

EDUCATION

University of Peshawar

Peshawar, Pakistan

Bachelor

2020 – 2024

- Among the top 3% of the batch with a GPA of 3.98
- Relevant coursework: Quantum Mechanics, Computational Physics, Programming in Physics

ACHIEVEMENTS

- Built 10+ full-stack web applications using Next.js, MongoDB, and Tailwind CSS with responsive, production-ready user interfaces.
- Developed and integrated RESTful APIs, authentication systems, and database models using Node.js, Express.js, and MongoDB.
- Built and deployed AI-powered web applications by integrating LLM APIs, vector search (RAG), and modern full-stack architecture.

CERTIFICATIONS

- [Full-Stack Development 101 by Simplilearn \(SkillUP\)](#) – May'26
- Generative AI Mastermind by Outskill – Jul'26
